

Smart Construction Pilot Flex v1.12.1 feature improvements

EARTHBRAIN

Changes and New Features

Key Updates

1. Added the BigCutFill view
2. Added support for landscape orientation
3. Added the ability to change design data from the Machine Guidance screen
4. Added multilingual support for German, French, Spanish, Italian, Dutch, and Polish

Others

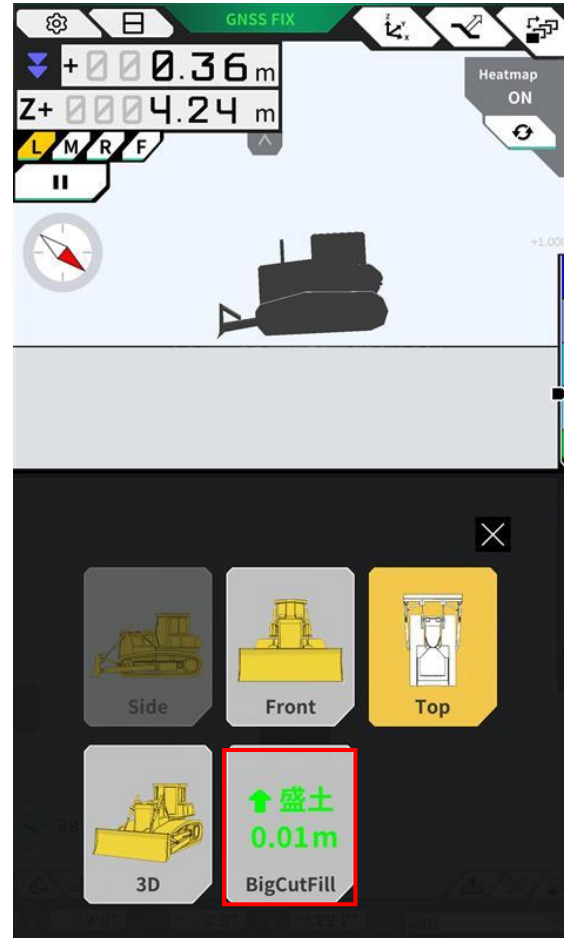

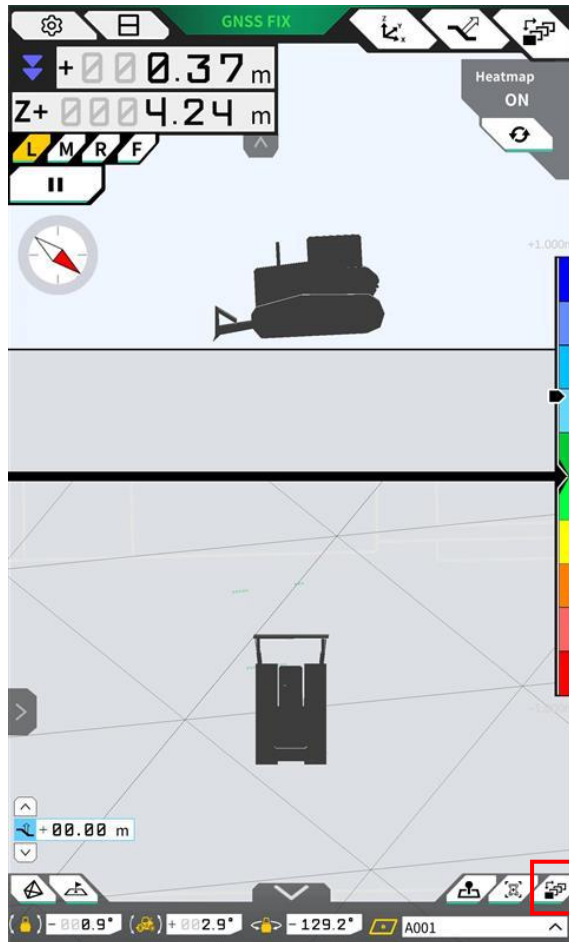

- Fix for the issue where switching the Ntrip client from version 2 to version 1 fails
- Fix for the vehicle rendering issue in the WSU (West-South-Up) coordinate system
- Other bug fixes and specification changes

1. Added the BigCutFill view

A new screen mode has been added that displays the cut or fill value required to reach the target design elevation (finished surface) in a large, easy-to-read format.

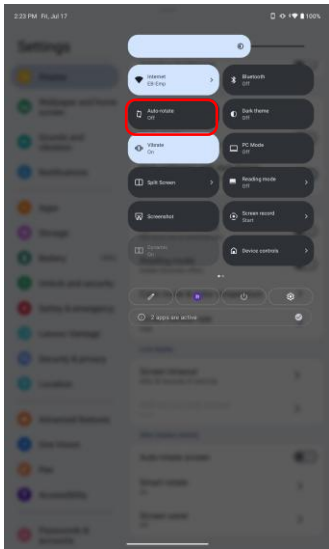

※The BigCutFill view cannot be selected in single-screen mode.

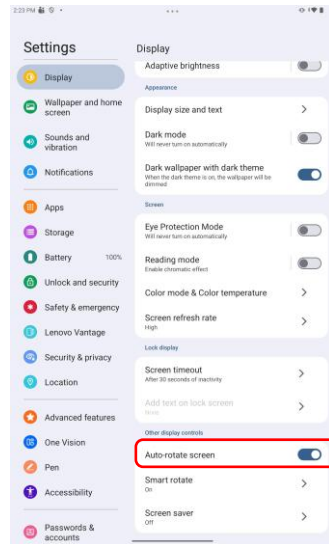

2. Added support for landscape orientation

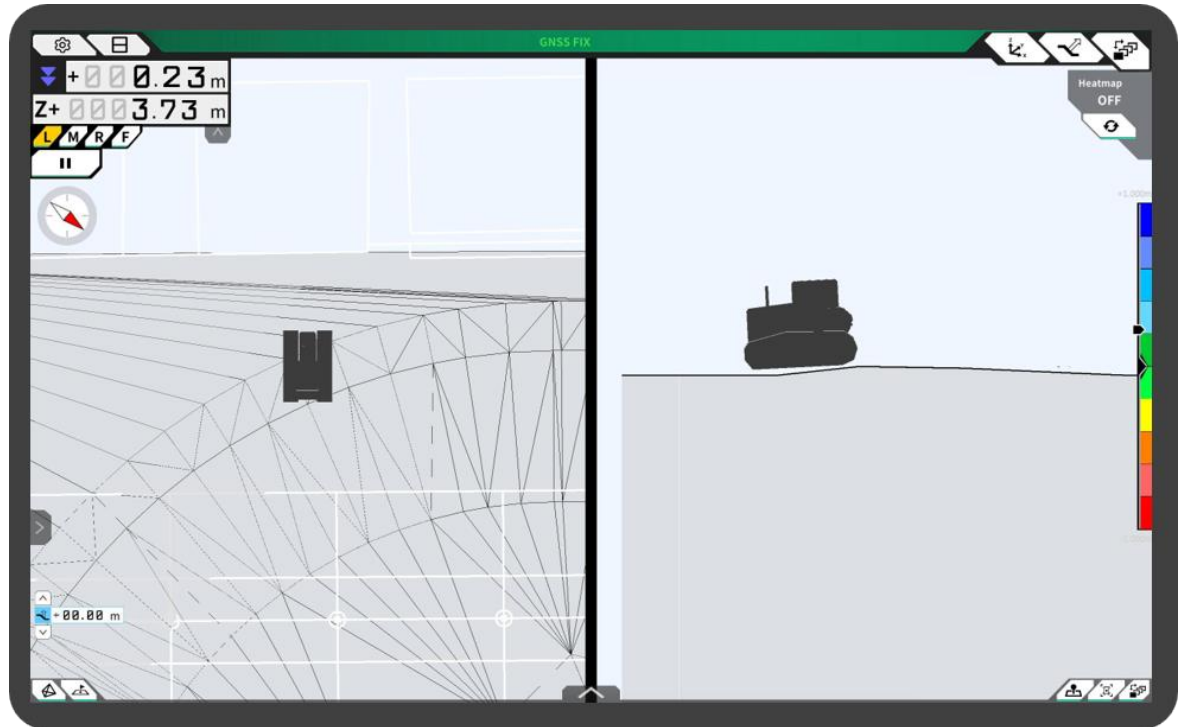

Support has been added for locking the tablet in landscape orientation. First, rotate the tablet to landscape orientation. Then swipe down from the top of the screen and tap the Auto-rotate icon, or tap the toggle under Settings > Display > Auto-rotate screen.

using a swipe gesture

From the tablet settings

3. Added the ability to change design data from the Machine Guidance screen

Design data can now be changed directly from the Machine Guidance screen by selecting it from a drop-down list.

Change the language from Common Settings > Language on the top screen after launching the app (Select from the drop-down list)
